

2
cancel

of said immunogens, said administrations resulting in an immune response in said mammal which substantially reduces the incidence or severity of at least one chronic immune-mediated disorder in the mammal, the first dose of said immunization schedule being administered when the mammal is less than 42 days old, measured from birth,
where said immunogens are administered from a kit according to claim 27.

✓
In claim 8, delete the "preferably" in line 2 and the ", more preferably...7 days old" on lines 2-4.

✓
In claim 10, delete ", more preferably...7 days".

✓
In claim 11, delete ", more preferably...14 days".

✓
In claim 14, delete ", more preferably...50%".

REMARKS

The claims have been amended to bring them into compliance with U.S. practice.

Respectfully submitted,

BROWDY AND NEIMARK
Attorneys for Applicant
